

FELT SHEEP

Body: full-sheet option

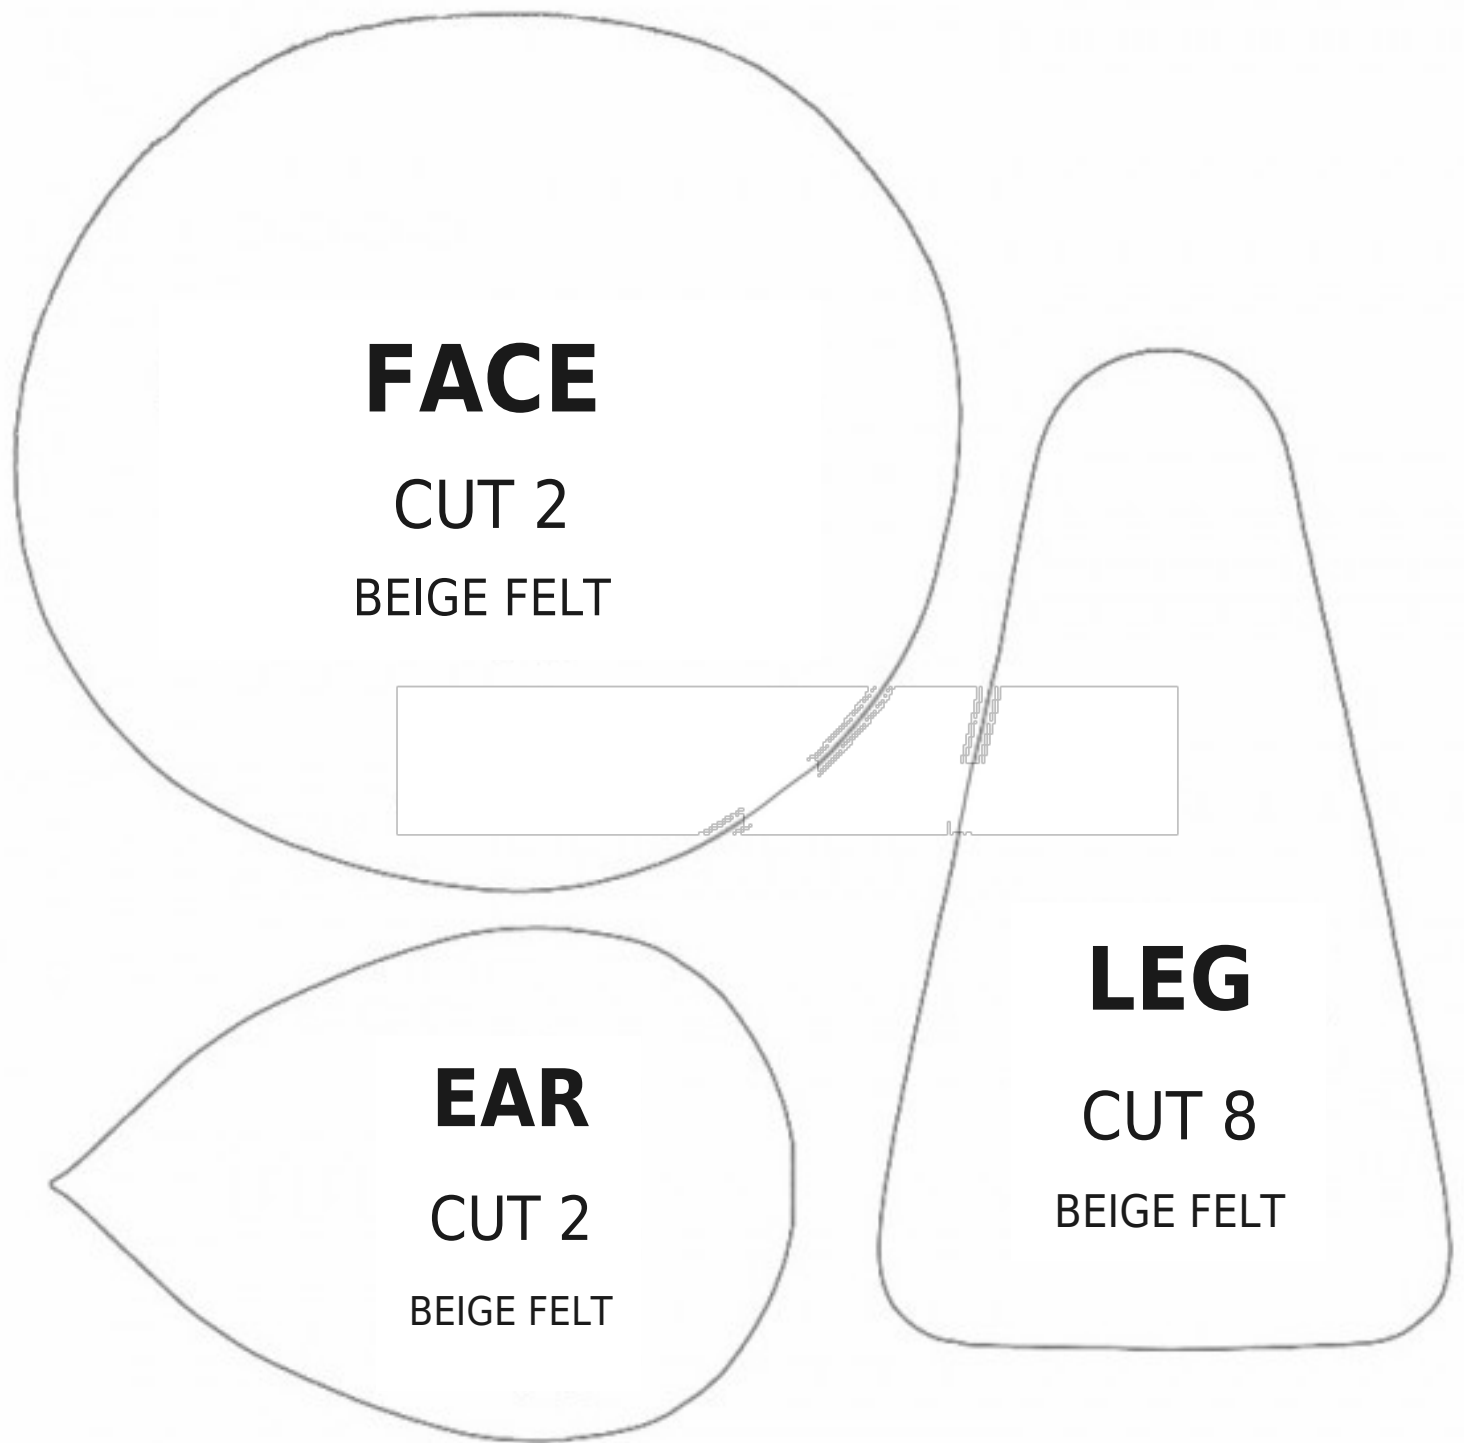

For normal printers use pages 3-4

BODY

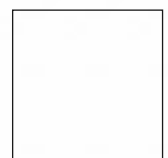

CUT 2

WHITE FELT

FELT SHEEP | Face, ear and leg patterns

Print pages 2-4 for normal A4 home printers.
Page 1 is the full-sheet body alternative.
Use page 1 only if its entire outline prints unclipped.
Print at 100% / Actual size. Turn off Fit and Shrink.
Cut on the outlines; do not add seam allowance.
14 pieces: 2 body + 2 face + 2 ears + 8 leg panels.
Use either body option, never both.

20 x 20 mm
outer-edge check

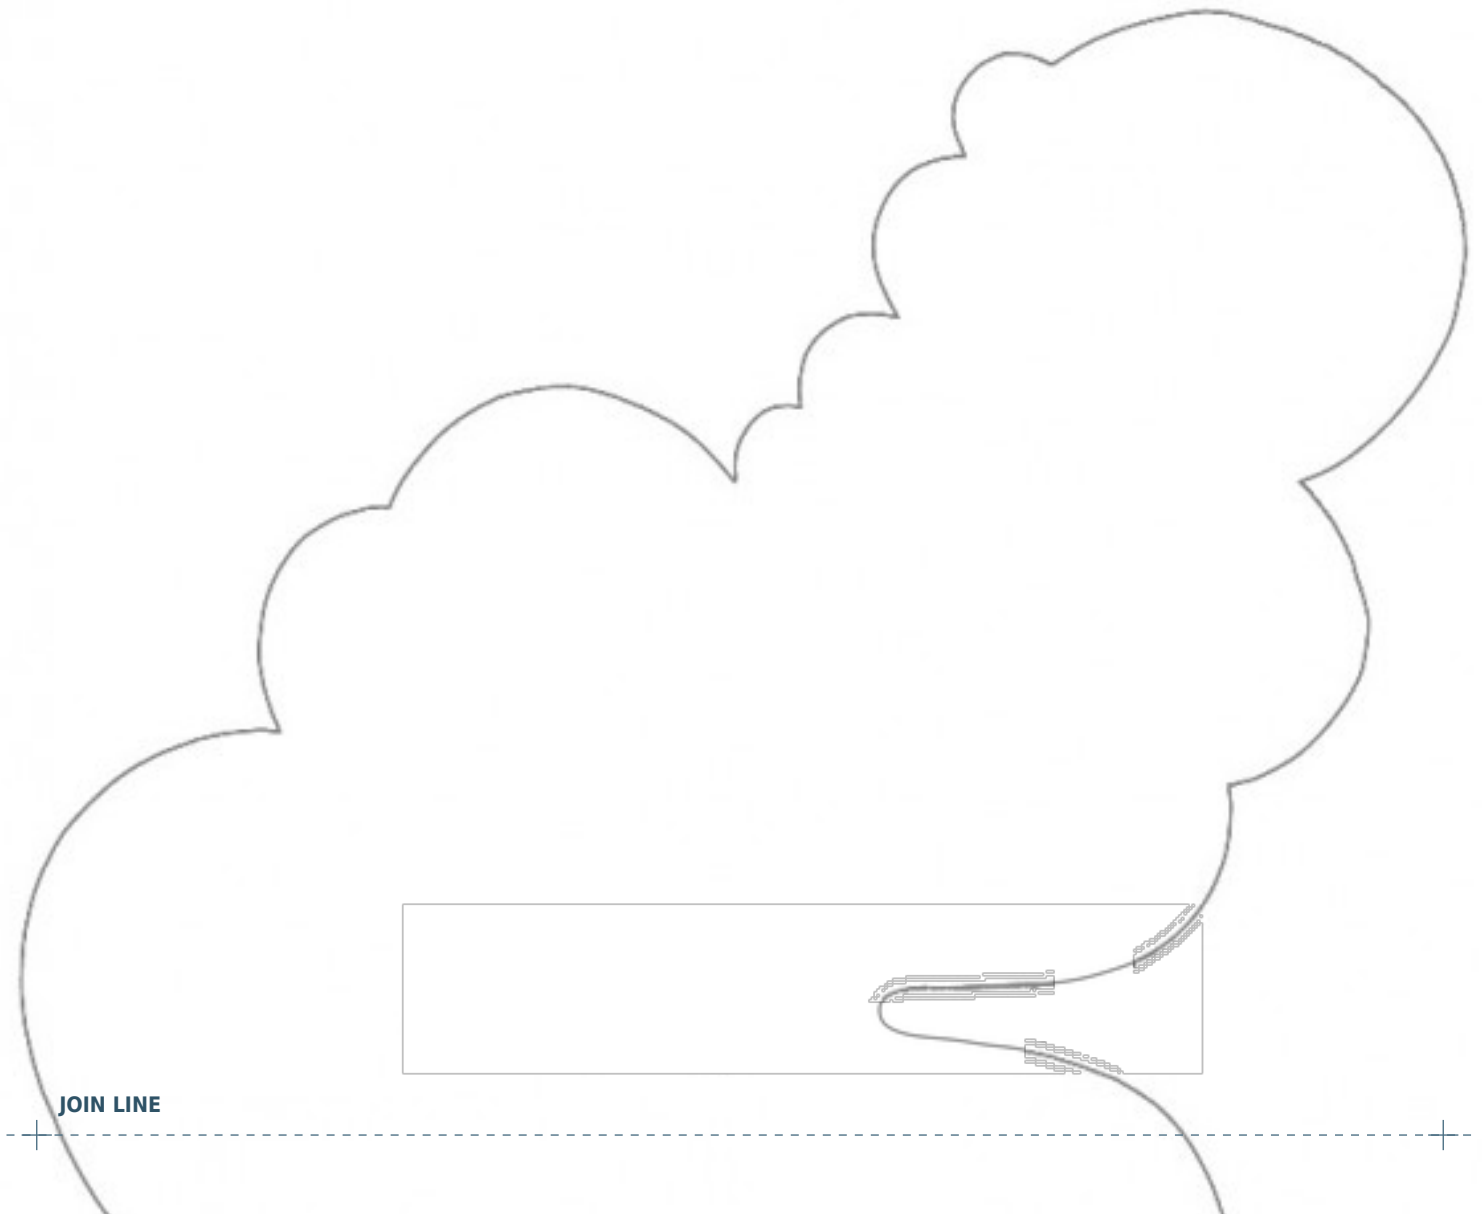

The source states approx. 33 x 24 cm finished; actual finished size is unverified.
Same scale on all sheets: 600 source pixels = 210 mm; no stretching.
Source: Rukodelion / vk.com/manustore. Labels translated; source marks removed.
Only logo crossings in contours were locally reconstructed. Not test-sewn.

Felt sheep: body tile A

Print at 100% / Actual size on A4. Do not use Fit or Shrink.

Join pages 3 and 4 to make one body template; cut 2 from white felt.

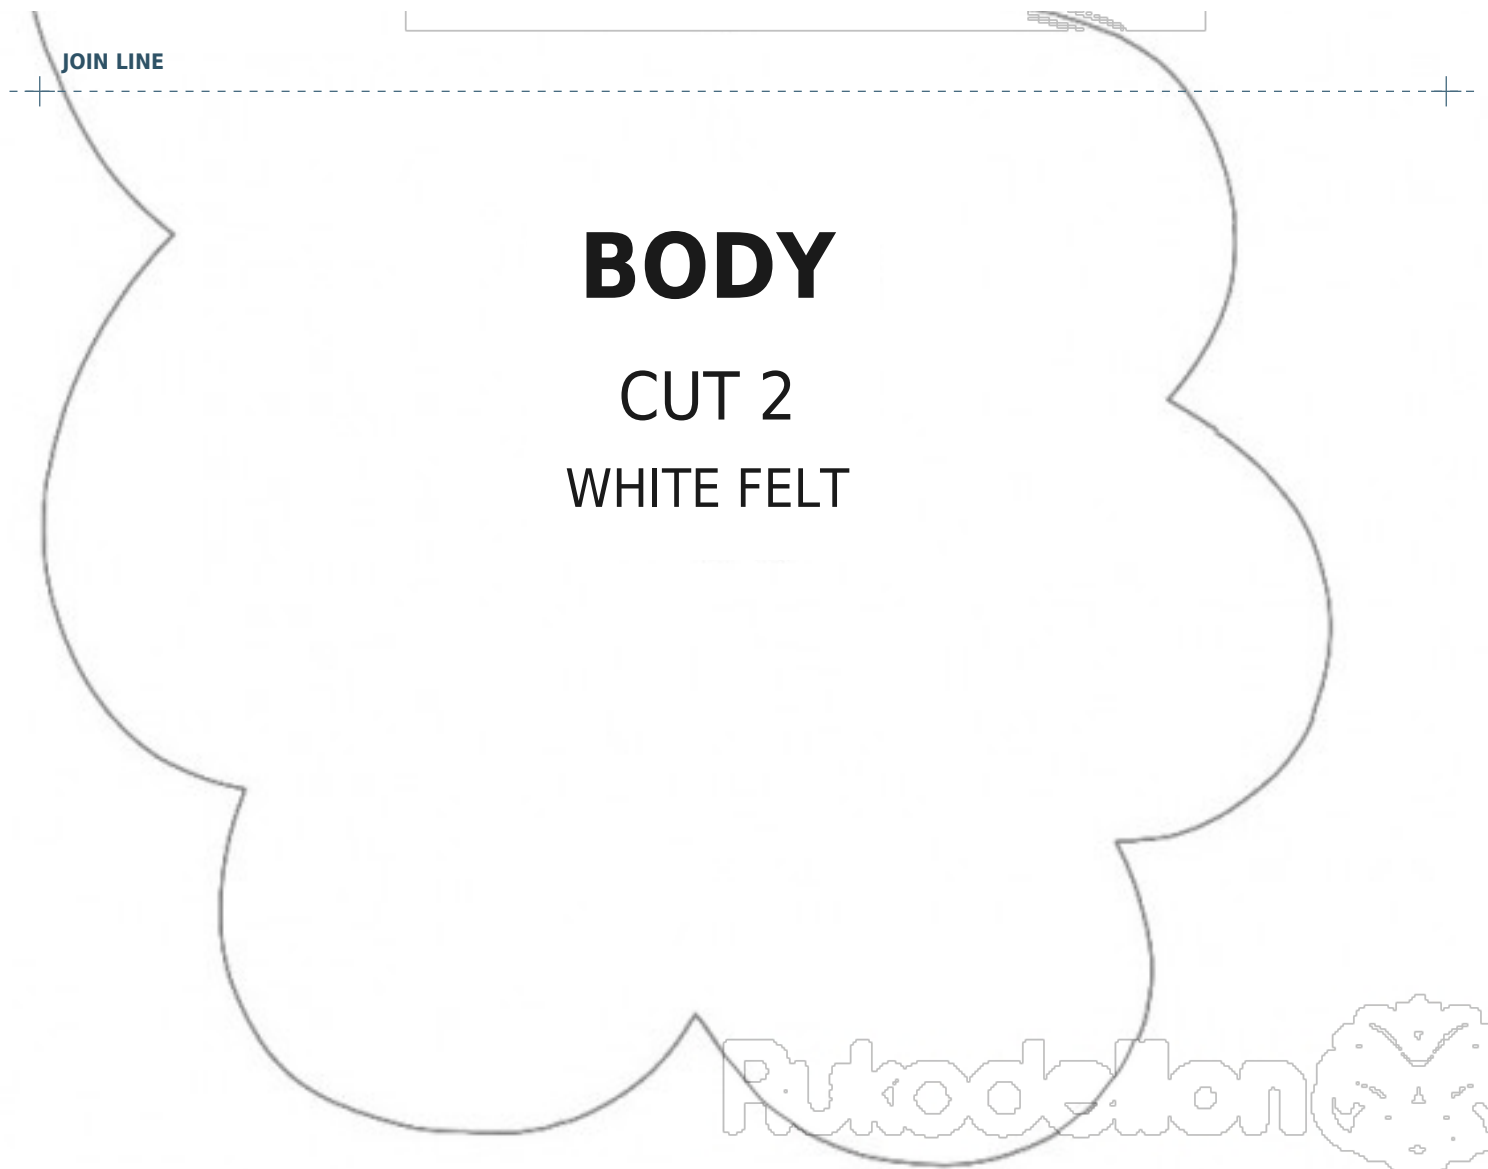

1. Trim tile A along the dashed JOIN LINE.
2. Place A over B. Match both crosses and the dashed line exactly.
3. Check the body outline continues smoothly; tape the sheets together.

Felt sheep: body tile B

Print at 100% / Actual size on A4. Do not use Fit or Shrink.

Join pages 3 and 4 to make one body template; cut 2 from white felt.

Keep tile B whole. Overlay the trimmed tile A at the JOIN LINE.

Match the two registration crosses; the 21 mm repeated strip aligns the pattern.

Cut out the joined body template only after taping.
